Quick magnetic mounting

ZLEDLIGHTING'S ECOSTRIP is the perfect solution for surface mounting, retrofits, re-lights and many other applications. The ease of installation, seamless connections and lower cost makes it ideal for applications where even light-distribution is required like workspaces, healthcare facilities, educational and retail locations.

ECOSTRIP delivers sufficient lighting without all the maintenance hassles related to fluorescent tubes and ballasts. Installation is made simple with a built-in driver, magnets for retrofit applications or clips for simple ceiling mountings. Seamless connections also allow for long runs up to (58.52') 16 strips maximum for surface mount linear.

ECOSTRIP has become a popular fixture with electrical contractors as a surface mount fixture and a retrofit solution. To make the purchase process easier, we are offering two kits.
